# COVER LETTER

Hello ImmoScout24's team,

Tech-savvy with a business background, I am having a blast shaping web applications with hands-on skills in a range of tools and programming languages. I would be thrived and proud to leverage my skills to become of the next Front-end Developer in a company like ImmoScout24.

Over the past year, as a freelance Front-End Developer, I have developed responsive websites and e-commerce applications using a modern tech stack, following severely my customers needs. Please consider the following summary:

- Developed front-end interfaces using React.js with Gatsby.js and Next.js frameworks
- Improved my HTML and CSS abilities through 10+ front-end small projects
- Connected front-end to Sanity/Keystone, or Rails with GraphQL and REST APIs
- Created e-commerce websites for small companies using various CMS like PrestaShop or WooCommerce

It would be a pleasure to learn more about ImmoScout24's needs, and I would be delighted to get the opportunity to show you my deep motivation and my technical abilities. Thanks for considering my application for this position. I hope to hear from you soon to schedule an interview.

Regards,

Tom Renard
